Specifically designed for the **food industry**:

- **Stainless steel** housings.
- **Highly visible blue color**. It helps to identify particles which may accidentally end up in contact with the food, thus minimizing the risk of contamination.
- **It assists** in keeping the castor **clean** as spores, mould, food residues and detergents are more visible than with wheels of different colors.

Suitable on smooth and compact flooring. Not recommended for areas with obstacles.

Examples of recommended applications: **meat, fish, vegetable processing machines** and **mixers**.
